

# AirStash™ Press Kit

## Headline

### **Wireless flash drive with built-in media server for your pocket.**

AirStash™ is the world's first wireless flash drive that enables you to access and share your files wirelessly with multiple mobile devices.

## Copy (Short)

AirStash™ stores your movies, music, photos, and documents and wirelessly shares them with your phone, media player, netbook, tablet, computer, and more. Use AirStash like a USB flash drive to drag & drop the files you want to your SD card while charging the built-in lithium polymer battery, then unplug & play on your browser-enabled WiFi devices.

## Copy (Long)

AirStash™ is the world's first wireless flash drive that enables you to share media files with your friends and business associates on-the-go. Let your iPhone, iPod touch, or iPad breathe with unlimited expandable storage that frees up the limited space in your iPhone or iPod Touch for the apps you crave while providing wireless access to your ever expanding music, movies, and photos. Plug AirStash™ into the USB port of your computer to charge the long-lasting lithium-polymer battery and load up on media and document files. Slip your AirStash™ into a pocket, backpack, briefcase, or purse and use your iPhone or iPod Touch to surf your media collection instantly and wirelessly. Measuring just 3.6 x 1.9 x 0.5 inches, AirStash™ easily fits into your life without interfering with any case or accessory. Avid photographers can preview and share digital shots without a computer by plugging their camera's memory card into AirStash™. Share documents and presentations quickly and simultaneously to multiple devices without an internet connection. Drag and drop music and movies onto your AirStash™ as easily as any USB drive to share your media with your friends at the restaurant—or for the kids in the car! The AirStash™ platform is fully upgradable with many new features and applications coming soon!

## Features (Short)

### **Simple: No software to install—just drag & drop, unplug & play**

If you know how to use a flash drive and a web browser, you know how to use AirStash.

### **Convenient: Quick WiFi access to your files on multiple devices on-the-go**

Wirelessly share files with your phone, media player, netbook, tablet, computer, and more.

### **Social: Share your movies, music, photos, & documents**

Quick sharing of your media files to multiple devices simultaneously. Share in your car, camping, or at the coffee shop.

### **Unlimited storage with up to 32 GB per SD card / SD card adapter to iPhone & iPod touch**

Access your camera's photos from your iPhone by plugging in the SD/SDHC memory card. Travel light and have your workflow solution in-the-field.

### **Stream audio and video from your pocket with built-in HTML5 web media server**

Listen to music and watch movies directly from AirStash using the latest web streaming technologies (currently optimized for iPhone, iPod touch, and iPad).

### **Built-in rechargeable lithium polymer battery**

Long-lived battery recharges over USB while you drag & drop files.

### **Secure access with encryption**

Wireless password access and streaming encryption (WPA2) keeps your stash private. When you want to share, it's your choice.

### **Upgradeable & extensible platform**

Add new features as they become available with simple downloads from your computer.

## Features (Long)

### **Simple: No software to install—just drag & drop, unplug & play**

If you know how to use a flash drive and a web browser, you know how to use AirStash™. Just plug AirStash into your computer and it appears on your desktop as a disk drive. Drag & drop your files over high speed USB while recharging the built-in lithium-polymer battery. AirStash works with almost all modern operating systems, including Windows, OS X, and Chrome OS, and almost any device that can use a USB thumb drive!

### **Convenient: Quick WiFi access to your files on multiple devices on-the-go**

Wirelessly share files with your phone, media player, netbook, tablet, computer, and more. Works with browser-enabled WiFi devices. Carry all your media files for instant streaming anytime, anywhere — no need to worry about cloud security, bandwidth, or internet access restrictions.

### **Social: Share your movies, music, photos, & documents**

AirStash™ shares your files with multiple devices simultaneously. Don't make everyone huddle around a single computer screen to see the latest family pictures and videos. Now everyone can share and enjoy on their own wireless device. Put AirStash in your briefcase to share files with your business associates without waiting for email.

### **Unlimited storage with up to 32 GB per SD card / SD card adapter to iPhone & iPod touch**

AirStash™ brings standard SD/SDHC and microSD/SDHC cards to the iPhone and iPod touch for convenient, hot-swappable access to flash cards on-the-go. Download photos to the iPhone or iPod touch gallery with one tap and use your favorite apps to edit and upload. Photographers can finally leave the bulky laptop at home.

### **Stream audio and video from your pocket with built-in HTML5 web media server**

AirStash™ is currently optimized for the iPhone, iPod touch, and iPad with HTML5, so it looks and feels like a native application; however, you can still access your files with WiFi browser-enabled devices like your Blackberry® smartphone, Android phone, Palm Pre™, netbook, tablet, laptop, etc.

### **Built-in rechargeable lithium polymer battery**

AirStash™ contains state-of-the-art battery technology. Its long-lived battery recharges over USB while you drag & drop files.

### **Secure access with encryption**

It's your stash of files and you want to maintain control! Keep all your files securely in your pocket and away from internet hackers looking to bring down the cloud. Wireless password access and streaming encryption (WPA2) keeps your stash private. When you want to share, it's your choice.

### **Upgradeable & extensible platform**

Add new features as they become available with simple downloads from your computer.
